

Wizard® MANUAL TOP-OFF

NEW! MORE EFFECTIVE DESIGN

- Easier Operation
- Better Durability
- Heavy-Duty Design
- Better Mount and Traction on the Drum

Available From:

Convenient

This Wizard Top-Off or manual drum deheader is a convenient way to remove drum tops or bottoms for companies with an occasional drum deheading need. The Wizard Top-Off is designed for use on 30 to 55 gallon steel drums.

Simple to Use

Easily mounts on the chime of the drum.

Designed to keep deheader tightly aligned against drum while cutting.

The blade is easily replaced in minutes. Cutting angles are set for maximum penetration and service life.

Minimum Operator Effort

The long handle creates excellent leverage and is equipped with a comfort hand grip for operator comfort.

The guiding handle is positioned for ease of operation and stability.

Durable

Designed for durability... The blade is hardened steel.

Cutting Blade: 2 3/4 in. hardened steel.

Length: 19 in. fully extended.

Weight: 6 lbs. shipping 7 lbs.

Immediate UPS delivery available.

Self-propelled Deheaders... For high volume steel and fibre drum users, we recommend one of our Wizard® or Wiz-Kid® self-propelled models.
