

NEW WIZARD® Portable Fiber Drum Dechimer PFD SERIES

New and available only from WIZARD®, Wizard Portable Fiber Drum Dechimer, made in the U.S.A. safely and easily removes metal chimes from the tops and bottoms of all fiber drums in just minutes.

Sell the fiber. Trim your costs. Generate Quick Payback.

Once the metal chimes are removed, the empty fiber drum material can be sold. The metal chimes can also be recycled.

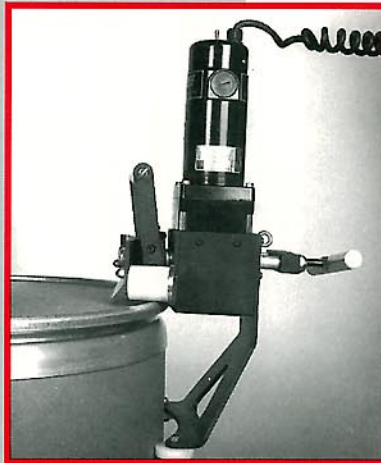

CONSIDER THESE FIBER DRUM DECHIMER BENEFITS:

Get money back from the sale of the fiber material. *Stay ahead of pending governmental regulations.* Landfill sites are filling up and closing fast. In the future, there may be no room at landfills for fiber drums. *Reduce operating expenses.* Dechiming fiber drums reduces waste costs, hauling costs, storage costs and landfill fees. *Reduce storage space.* No need to accumulate drums for pick up. Put your storage space to more productive use.

The WIZARD® Portable Fiber Drum Dechimer - Patent Pending is designed for a moderate to low volume of drums (less than 50 drums per day), or for operations where drums are stored in more than one location. Place the unit on a drum, make an easy torque adjustment and start it. It moves around the drum by itself, removing a chime in less than one minute, per side.

The WIZARD® Portable Fiber Drum Dechimer is:

- **Portable and light weight** – it goes wherever drums accumulate and weighs only 25 lbs.
- **Fast** – Removes chimes in less than a minute per side.
- **Universal** – Works on all types and sizes of fiber drums.
- **Easy to Operate** – Just put it on the drum and it moves itself around the drum. No complicated operating instructions required.
- **Ergonomically designed** – Easy to grasp, hold, operate and move.
- **Durable** – Made of high strength aluminum and hardened tool steel.
- **Easily Adjustable** – Quick adjustment for any size drum.
- **Quiet** – Supplied with a quiet motor and tangle resistant cord.

THE WIZARD® PORTABLE FIBER DRUM DECHIMER LETS YOU:

- Dechime drums throughout your operation.
- Make fiber drum disposal a no hassle operation.
- Stay ahead of pending governmental regulations.
- Reduce expenses such as hauling, disposal, landfill and tipping fees.
- Reduce storage space and streamline plant operations.
